City, State, Zip	Olympia, WA 98504-0917
Phone	360-902-3000
Contact	Kat Moore, Email: kathryn.moore@rco.wa.gov

PLEASE DESCRIBE THE TYPE OF WORK TO BE COMPLETED

(Be as detailed as possible to avoid having to provide additional information)

Provide a detailed description of the proposed project:

This proposal will provide control of invasive knotweed within the North River watershed. The goal for the 2012 -2014 control season will be to evaluate and treat the remainder of the watershed. In 2011 phase I of the North River Knotweed control project was implemented. Crews will work downstream from the highest point of infestation.

Two crews of 2 or 3 will carry out control of invasive knotweed in the North River system. Re treatment will occur from the M-500 down stream (approximately 10 river miles). Initial treatment will occur from that point downstream (approximately 22 river miles). Crews will work downstream from the stopping point in 2011. The crew will also be responsible for the treatment of infestations in small streams that flow into the main stem of the North River within the upstream and downstream boundaries of the proposed treatment area. A top-down approach will be followed for all survey, treatment, and monitoring activities.

Pacific County Weed Board personnel will treat any knotweed infested on County rights-of-way that come into proximity of the watershed.

Public outreach and education will be continued via press releases, fair displays, and personal communications. The Pacific Conservation District will be dedicating time to public education, assistance and knotweed control monitoring. After knotweed control has been established the PCD will offer the CREP program (riparian planting) to landowners adjacent to the stream.

Describe existing project site conditions.

This is project will control the remaining knotweed infestation within the North River Watershed. The North River Watershed has a wide variety of land uses. Forestry, agriculture and rural holmes make up the majority of the land uses within the watershed.

HISTORIC & CULTURAL RESOURCES REVIEW

Describe any proposed ground disturbing activities. That is, will a tool(s) be used to move earth (soil, rock, gra

There will be no ground disturbing activities associated with this project. Liscenced Aquatic applicators will apply foliar applications to the non native, invasive knotweed species.

Will buildings be altered or demolished? If so please complete a DAHP Determination of Eligibility EZ2 form for each building affected by the proposed project and attach the form to your project in PRISM. <http://www.dahp.wa.gov/pages/Documents/Sites.htm>
